Professional Summary

Full Stack Developer with 3 years of experience building modern, responsive web applications, with a strong focus on frontend development. Skilled in **Vue**, **React**, and **Next.js** with **TypeScript**, and experienced in developing scalable backend systems using **Node.js (Express)**, **Python (Flask / Django)**, **C# (.Net)**. Proficient in designing and integrating **RESTful APIs** and working with relational databases such as **NoSQL**, **PostgreSQL** and **MySQL**.

Strong eye for UI/UX and user-centered design, with a focus on building clean, interactive, and performant interfaces. Comfortable working across the full development lifecycle—from frontend architecture and component design to backend logic and database integration. Seeking opportunities in freelance work and internship roles to contribute to real-world products while further strengthening system design and production-level development experience.

Skills

Frontend

- Vue.js, React, Next.js
- Typescript
- HTML5, CSS3, Javascript (ES6 +)
- UI development / Component-based architecture

Backend

- Node.js, Express
- Python (Flask, Django)
- C# (ASP.NET Core)
- Restful API design

Databases

- PostgreSQL
- MySQL

- NoSQL

Tools and Dev Practices

- Git and Github
- API Integration
- Responsive design
- Basic deployment

Projects

Product showcase / Catalogue Website

Tech Stack: Vue.js, TypeScript, Tailwind CSS

Developed a responsive product showcase and catalogue website focused on clean UI/UX and modern frontend design. Built reusable components for product listings, category sections, and featured collections while ensuring mobile responsiveness across devices. Optimized layout structure and user navigation to create a smooth browsing experience for users exploring products and brand offerings.

Gym Fitness Management Platform

Tech Stack: Javascript, Tailwind Css, Flask, PostgreSQL.

Built a full-stack fitness management platform featuring secure user authentication, coach assignment, and messaging functionality. Developed responsive frontend interfaces using Tailwind CSS and JavaScript, enabling users to register, sign in, view assigned coaches, and access personalized messages. Implemented backend logic with Flask and integrated a PostgreSQL database to manage user accounts, coach assignments, and application data efficiently.

SaaS Landing Page Replica

Tech Stack: Vue 3, Vite, Tailwind CSS, Motion One, Vue Router.

Built a highly responsive and visually engaging SaaS landing page inspired by modern product websites. Leveraged Vue 3 Composition API with reusable component architecture and implemented smooth entrance and scroll-based animations using Motion One. Focused on frontend performance optimization, responsive layouts, typography integration, and modern UI/UX patterns across desktop and mobile devices.

Professional Experience

(March 2023 – February 2024)

Freelance Full Stack Developer.

- Developed responsive web applications and landing pages for personal and client-focused projects.
- Built modern frontend interfaces using **Vue**, **React**, and **Tailwind CSS**.
- Implemented backend functionality and database integration using **Flask**, **Express**, **PostgreSQL**, and **MySQL**.
- Collaborated on project requirements, UI implementation, and responsive optimization across devices.

(April 2024 – December 2024)

Full Stack Developer at Codevanta Tech Startup

- I built responsive and interactive frontend interfaces using **React** and **Tailwind CSS**, improving user experience and application performance.

- Developed and maintained scalable backend **APIs** using **.NET**, implementing authentication, business logic, and secure data handling
- Designed and optimized database structures using both **NoSQL and MySQL**, selecting the appropriate database based on data needs and performance requirements
- Collaborated with product designers and backend engineers to translate requirements into clean, functional features

(August 2025 – March 2026)

Frontend Developer at Noolu Hq.

- Developed responsive and modern user interfaces for client web projects using Vue.js, React, JavaScript, and Tailwind CSS
- Collaborated with designers and developers to implement clean, user-focused frontend experiences across multiple projects
- Built reusable UI components and optimized layouts for responsiveness and cross-device compatibility
- Integrated frontend applications with backend APIs and contributed to improving overall application performance and usability
- Participated in project revisions, debugging, and frontend feature implementation within collaborative development workflows

Education

**Bachelor of Science – Mass communication/ Olabisi Onabanjo
University Ogun State**

GRADUATED 2016

Award / Nysc certificate (2018-2019)

Certifications & Programs

Ts Academy – Scholarship Program

Completed a software development scholarship program focused on practical web development and technical skill advancement.

Pediforte – Frontend and Backend Development Training

Completed practical training in frontend and backend web development, covering modern JavaScript frameworks, responsive UI development, backend systems, API integration, and database management.

Udemy – Web Development Courses

Completed multiple web development courses covering frontend engineering, backend development, JavaScript frameworks, TypeScript, and full-stack application development.
